## Introduction

A census has taken place in this country every ten years since 1801. The State of the Borough report draws mainly on data from the 2021 Census and provides a comprehensive collection of demographic information about the Borough of Chesterfield.

Comparisons are shown with Derbyshire County Council, the East Midlands and England and where possible at Ward Level. There are currently 19 wards in Chesterfield Borough.

## Summary

### The Borough of Chesterfield

N.B The summary below is based on the results of the 2021 Census. Ward boundaries for Chesterfield changed in 2023 following a review by the Local Government Boundary Commission. Please see <https://www.lgbce.org.uk/all-reviews/chesterfield> for more information. Further details and amended data (where available) based on the new boundaries is available further within this report.

Chesterfield is the second largest settlement in Derbyshire (Derby City is the largest). It is a relatively compact and mainly urban area. It is well known for its Parish Church, with its Crooked Spire. The M1 runs by the Borough's eastern boundary, while to the north and west there are sizeable areas of open countryside which lie in the northeast Derbyshire Greenbelt. The Rother Valley runs from the south to the north through the Borough and contains many long-established industrial environments, railways and the Chesterfield canal.

The market town of Chesterfield acts as the sub-regional centre for north-eastern Derbyshire and provides a range of retail, commercial, leisure and cultural facilities. The town is well located on the edge of the Peak District National Park and benefits from easy access to the surrounding cities of Sheffield, Derby and Nottingham

Chesterfield is a major centre of employment (over 48,000 people work in the Borough) and attracts 21,000 in-bound commuters on a daily basis. Its employment catchment area covers a large part of the surrounding districts of Bolsover and North East Derbyshire, as well as drawing in people from Derbyshire Dales and Sheffield. Chesterfield is the most important source of employment for Chesterfield residents with almost 31,000 (or 64%) working in the borough and a further 17,000 travelling outside the area for work.

On Census day 2021 Chesterfield Borough had a population of 103,600, 200 less than on Census day 2011.

Staveley lies on the eastern side of the Borough, approximately five miles from Chesterfield Town Centre – it is linked to the M1 and Chesterfield by the A619. It has a population of around 18,500, in a number of neighbourhoods. The majority of its employment prior to 1993 was mining, iron and steel and the chemical industry. The closure of the collieries caused serious economic decline in Staveley but in recent years, the Council has invested heavily in the area. Brimington is located halfway between Chesterfield and Staveley on the A619. It has an estimated population of 10,200. It is essentially residential, with a central shopping area.

## **Demography**

**Density** - Chesterfield is a predominantly urban area and therefore has a higher density of population than Derbyshire, the East Midlands and England. The higher densities border on the town centre (Rother, Brockwell and Holmebrook). Chesterfield was the only local authority area in the East Midlands to see its population decline in the 2021 census. The regional population increased by 7.7%, while the population of England increased by 6.6%. In 2021, Chesterfield was home to around 11.2 people per football pitch-sized piece of land. This area was among the top 35% most densely populated English local authority areas at the last census.

**Age** - The age range generally reflects the County average. Between the last two censuses, the average (median) age of Chesterfield increased by two years, from 42 to 44 years of age. This area had a higher average (median) age than the East Midlands as a whole in 2021 (41 years) and a higher average (median) age than England (40 years). The median age is the age of the person in the middle of the group, meaning that one half of the group is younger than that person and the other half is older. The number of people aged 65 to 74 years rose by around 2,000 (an increase of 19.5%), while the number of residents between 35 and 49 years fell by around 3,900 (17.0% decrease).

**Ethnicity** – the Borough has a higher proportion of residents from minority ethnic backgrounds than in Derbyshire, with the main populations in St. Leonards, St. Helen's, Holmebrook and Moor. In 2021, 1.4% of Chesterfield residents identified their ethnic group within the "Mixed or Multiple" category, up from 1.1% in 2011. The 0.4 percentage-point change was the largest increase among high-level ethnic groups in this area. Across the East Midlands, the percentage of people from "Mixed or Multiple ethnic groups" increased from 1.9% to 2.4%, while across England the percentage increased from 2.3% to 3.0%. In 2021, 95.5% of people in Chesterfield identified their ethnic group within the "White" category (compared with 96.5% in 2011), while 1.9% identified their ethnic group within the "Asian, Asian British or Asian Welsh" category (compared with 1.5% the previous decade). The percentage of people who identified their ethnic group within the "Black, Black British, Black Welsh, Caribbean or African" category increased from 0.8% in 2011 to 0.8% in 2021.

**Religion** - In 2021, 44.5% of Chesterfield residents reported having "No religion", up from 27.2% in 2011. The rise of 17.3 percentage points was the largest increase of all broad religious groups in Chesterfield. Across the East Midlands, the percentage of residents who

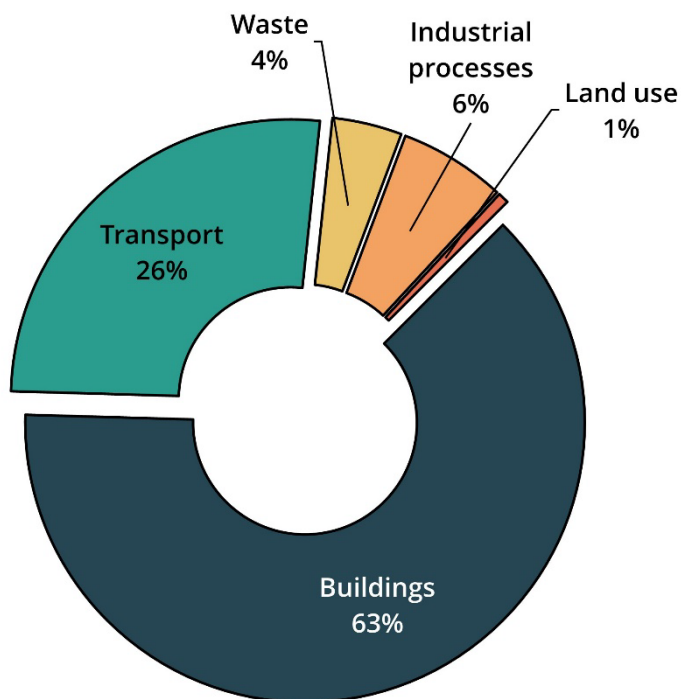

described themselves as having "No religion" increased from 27.5% to 40.0%, while across England the percentage increased from 24.8% to 36.7%. In 2021, 47.7% of people in Chesterfield described themselves as Christian (down from 63.8%), while 5.6% did not state their religion (down from 7.4% the decade before).

Country of Birth - In the latest census, around 97,000 Chesterfield residents said they were born in England. This represented 93.6% of the local population. The figure has decreased from just under 98,200 in 2011, which at the time represented 94.6% of Chesterfield's population. Scotland was the next most represented, with just over 800 Chesterfield residents reporting this country of birth (0.8%). This figure was down from just over 950 in 2011, which at the time represented 0.9% of the population of Chesterfield. The number of Chesterfield residents born in Poland rose from around 300 in 2011 (0.3% of the local population) to around 500 in 2021 (0.5%).

### Climate Change

Climate change is a significant issue that affects everybody. In common with many other local authorities, the council declared a climate emergency in 2019 with the intention of becoming a carbon neutral organisation by 2030 and supporting the transition of the borough to carbon neutrality by 2050.

The most recent data available shows borough-wide emissions stand at 493,686 tCO<sub>2</sub>e, with emissions falling by 7.5% between 2019 and 2020. The graph below shows the breakdown of these emissions by sector.

Changes to the climate in Chesterfield have already been observed: peak summer temperatures have risen by an average of 1.9°C and average winter rainfall has increased by 12% since records began in 1880.

Future changes to the climate depend on how quickly humans act to change our activity, but current projections suggest that we can expect average summer temperatures in the borough to increase by between 1.6 and 6.3°C by 2080 (when compared to pre-industrial levels). We can also expect winter rainfall to increase by between 6% and 56% over the same period. The wide margin of possible effects is a reflection of the uncertainty in how global emissions will change over the next fifty years.

The expected changes in the climate within the borough are likely to result in the increased frequency and severity of extreme weather events, including flooding, droughts, and heatwaves. The effects are likely to disproportionately affect the most vulnerable in our society, particularly residents in areas of high deprivation, the disabled, young children, and the elderly.

We need to act now to protect the future of our borough and play our part in the world-wide drive to reduce the effects of climate change.

Chesterfield Borough Council's Climate Change Annual Report can be found here: <https://www.chesterfield.gov.uk/media/2287631/climate-change-annual-report-2022-2023.pdf>

## **Sustainable Communities**

Due to a marginal exceedance of the national Air Quality Standards we have declared an air quality management area. The Council also monitors for sulphur dioxide and particulate matter.

The Borough has 12 conservation areas and 244 listed buildings.

## **Accessible Communities**

The Borough has a higher percentage (23.9%) of households with no access to a car or van than Derbyshire (17.2%), East Midlands (19.1%) and England (23.5%). The highest percentage (38.6%) is in Rother compared to just 11.9% in Walton.

The majority of Chesterfield Borough residents live within a 20-minute walk of essential services, including GPs, Pharmacies, Schools, Post Offices etc. (a significant percentage within 10 minutes).

## **Living Communities**

Chesterfield has a considerably higher percentage of social housing (23.1%) than in Derbyshire, (15.3%) East Midlands (15.8%) and England (17.7%). The highest percentages are in Middlecroft and Poolsbrook. Chesterfield's housing offer is focused towards lower and middle market housing, with a smaller proportion of larger detached properties (24.7%) than the Derbyshire average (32.8%).

The Borough has a far lower percentage (62.9) of owner occupiers than in Derbyshire (70.5%). The highest percentages are in Walton (88.9%) and West (86.5%); the lowest percentages are in Middlecroft and Poolsbrook (41.9%), Rother (42.2%) and Holmebrook (43.9%).

The private rented sector appears to be continuing to grow rapidly with particular concentrations in Holmebrook and St. Helens.

## **Working and Learning Communities**

Of Chesterfield residents aged 16 years and over, 54.2% said they were employed (excluding full-time students) in 2021, down from 54.6% in 2011. In 2021, just under 1 in 40 people (2.3%) said they were unemployed, compared with 4.2% in 2011. The percentage of retired Chesterfield residents increased from 25.1% to 25.7%. The decrease in the percentage of people aged 16 years and over (excluding full-time students) who were employed was greater across the East Midlands (1.0 percentage points, from 56.1% to 55.1%) than in Chesterfield (0.4 percentage points). Across England, the percentage fell by 0.8 percentage points, from 56.5% to 55.7%.

In 2021, 9.7% of Chesterfield residents aged 16 years and over and in employment said they worked 15 hours or less per week. This figure increased from 9.2% in 2011. In 2021, just over 1 in 11 people (9.4%) said they worked over 49 hours per week, compared with 11.2% in 2011. The percentage of adults in employment working 31 to 48 hours per week increased from 57.1% to 59.1%. The percentage of people aged 16 years and over and in employment who said they usually worked 15 hours or less per week remained 9.8% across the East Midlands. Across England, the percentage increased from 9.7% to 10.3%.

Please note: Census 2021 took place during the coronavirus (COVID-19) pandemic, a period of rapid and unparalleled change; the national lockdown, associated guidance and furlough measures will have affected the labour market and our ability to measure it.

## **Safe, Healthy and Active Communities**

Health - In 2021, 42.7% of Chesterfield residents described their health as "very good", increasing from 41.4% in 2011. Those describing their health as "good" rose from 34.4% to 34.6%. These are age-standardised proportions. The proportion of Chesterfield residents describing their health as "very bad" was 1.5% (similar to 2011), while those describing their health as "bad" fell from 6.0% to 5.4%.

Please note: Census 2021 was conducted during the coronavirus (COVID-19) pandemic. This may have influenced how people perceived and rated their health, and therefore may have affected how people chose to respond.

Dependent children - Of Chesterfield households, 18.1% included a couple but no children in 2021, down from 19.4% in 2011.

In 2021, just under one in six households (16.3%) included a couple with dependent children, compared with 18.2% in 2011. The percentage of single-family households including a couple

living with only non-dependent children increased from 5.8% to 6.0%. The decrease in the percentage of households including a couple but no children in Chesterfield (1.3 percentage points) was similar to the decrease across the East Midlands (1.3 percentage points, from 19.5% to 18.2%). Across England, the percentage fell by 0.9 percentage points, from 17.6% to 16.8%.

**Marital status** - Of Chesterfield residents aged 16 years and over, 35.7% said they had never been married or in a civil partnership in 2021, up from 31.6% in 2011. In 2021, just over 4 in 10 people (43.5%) said they were married or in a registered civil partnership, compared with 47.1% in 2011. The percentage of adults in Chesterfield that had divorced or dissolved a civil partnership increased from 10.9% to 11.2%. The increase in the percentage of people aged 16 years and over who had never been married or in a civil partnership was greater in Chesterfield (4.2 percentage points) than across the East Midlands (3.8 percentage points, from 32.3% to 36.1%). Across England, the percentage increased by 3.3 percentage points, from 34.6% to 37.9%. These figures include same-sex marriages and opposite-sex civil partnerships in 2021, neither of which were legally recognised in England and Wales in 2011. Same-sex marriages have been legally recognised in England and Wales since 2014 and opposite-sex civil partnerships have been recognised since 2019.

**Disability** - In 2021, 9.9% of Chesterfield residents were identified as being disabled and limited a lot. This figure decreased from 11.6% in 2011. In 2021, around one in eight people (12.5%) were identified as being disabled and limited a little, compared with 11.7% in 2011. The proportion of Chesterfield residents who were not disabled increased from 76.8% to 77.7%. The decrease in the proportion of residents who were identified as being disabled and limited a lot in Chesterfield (1.7 percentage points) was similar to the decrease across the East Midlands (1.6 percentage points, from 9.3% to 7.7%). Across England, the proportion fell by 1.6 percentage points, from 9.1% to 7.5%.

Life expectancy is 8.8 years lower for men and 7.4 years lower for women in the most deprived areas of Chesterfield than in the least deprived areas.

In Year 6, 21.1% of children are classified as obese, and 71.1% of adults are classified as overweight or obese. The rate of self-harm hospital stays, smoking related deaths and drug misuse are worse than average.

## **Index of Multiple Deprivation 2019**

Chesterfield is the 86<sup>th</sup> most deprived area in England out of 317 English local authorities. There are 69 lower layer super output areas (LSOAs) in Chesterfield. Overall compared to England, 6 LSOAs are in the 10% worst deprived, and a further 14 LSOAs are in the 20% most deprived.

Grangewood in Rother is the second most deprived neighbourhood in Derbyshire and within the 2% most deprived areas in England. Six neighbourhoods in Chesterfield (9% of our total neighbourhoods) fall within the 10% most deprived in England.

While our overall indices rank has improved slightly moving from 85 to 86 this has been helped significantly by our strong rankings for crime, barriers to housing and services and living environment. We are now in the 10% least deprived areas for living environment and within the 20% least deprived for crime and access to housing and services. However key domains including health, income, income affecting children and employment have deteriorated. Chesterfield Borough is within the 10% most deprived local authority areas in England for health and disability deprivation for both the 2015 and 2019 indices of multiple deprivation, however the rank has fallen significantly from 25 to 13 placing us within the 5% most deprived areas in England for this domain. The next Index of Multiple Deprivation is expected to be released towards the end of 2025.

## Demography

### Population and Population Change 2011 - 2021

Area	Total Population		Change 2011 - 2021	
	2011	2021	Number	%

## Sustainable Communities

### **Air Quality in Chesterfield**

There is a duty placed on local authorities under the Environment Act 1995 to measure and record the levels of certain air pollutants within their borough. The results of the monitoring data are summarised in reports which are submitted to the Department of Environment, Food, and Rural Affairs (DEFRA) on an annual basis as part of the Review and Assessment process. If prescribed levels of certain pollutants are exceeded during the year there is a requirement on the council to make a more thorough assessment of pollutant levels at any air quality hotspots identified. The results of detailed assessments may indicate the need for the local authority to declare all or part of their borough as an Air Quality Management Area (AQMA). An action plan to tackle specific air quality problem areas must be produced within 12 months of an AQMA declaration. A marginal exceedance of the national Air Quality Standards was found to have occurred and, as such, we have declared an Air Quality Management Area. The Action Plan is currently being drafted.

### **Annual Data from Monitoring Stations**

Pollutant concentrations are below the Air Quality Objectives (AQO) at all monitoring locations across the borough, the first time that this has been the case since 2011. We declared an Air Quality Management Area in Brimington, and as the monitoring results at this location have fluctuated around the AQO we do not intend to remove this declaration until we can be sure that the improvement is sustained. The long-term trend displays a reduction in the levels. PM<sub>10</sub>, and Benzene levels are within the Air Quality Objective.

### **Nitrogen Dioxide (NO<sub>2</sub>) Automatic Monitoring Data**

Nitrogen Dioxide is monitored by the use of two Automatic Urban/Rural Network (AURN) affiliated sites. These automatically monitor for oxides of nitrogen and fine particulate materials, downloading data to a DEFRA operated database. This allows the gathering of near real-time pollution data. These sites also allow the co-location of diffusion tubes to validate monthly exposed diffusion tubes which are located at appropriate sites around the borough.

## Results of Automatic Monitoring for Nitrogen Dioxide: Comparison with Annual Mean Objective

Site ID	X OS Grid Ref (Easting)	Y OS Grid Ref (Northing)	Site Type	Valid Data Capture for Monitoring Period (%)	Valid Data Capture 2022 (%)	2018	2019	2020	2021	2022
AURN 1	463348	370651	Roadside	97.5	97.5	16.8	17.4	14.9	15.9	15.2
AURN 2	436472	372038	Urban Background	97.6	97.6	12.2	12.4	8.1	13.9	11.5

Annualisation has been conducted where data capture is <75% and >25% in line with LAQM.TG16.

Reported concentrations are those at the location of the monitoring site (annualised, as required), i.e. prior to any fall-off with distance correction.

### Notes:

The annual mean concentrations are presented as  $\mu\text{g}/\text{m}^3$ .

Exceedances of the  $\text{NO}_2$  annual mean objective of  $40\mu\text{g}/\text{m}^3$  are shown in **bold**.

All means have been "annualised" as per LAQM.TG16 if valid data capture for the full calendar year is less than 75%.

Concentrations are those at the location of monitoring and not those following any fall-off with distance adjustment.

(1) Data capture for the monitoring period, in cases where monitoring was only carried out for part of the year.

(2) Data capture for the full calendar year (e.g. if monitoring was carried out for 6 months, the maximum data capture for the full calendar year is 50%).

## 1-Hour Mean $\text{NO}_2$ Monitoring Results, Number of 1-Hour Means > $200\mu\text{g}/\text{m}^3$

Site ID	X OS Grid Ref (Easting)	Y OS Grid Ref (Northing)	Site Type	Valid Data Capture for Monitoring Period (%)	Valid Data Capture 2022 (%)	2018	2019	2020	2021	2022
AURN 1	463348	370651	Roadside	97.5	97.5	0	0	0	0	0
AURN 2	436472	372038	Urban Background	97.6	97.6	<b>0</b> (58.2)	0	0	0	0

### Notes:

Results are presented as the number of 1-hour periods where concentrations greater than  $200\mu\text{g}/\text{m}^3$  have been recorded.

Exceedances of the  $\text{NO}_2$  1-hour mean objective ( $200\mu\text{g}/\text{m}^3$  not to be exceeded more than 18 times/year) are shown in **bold**.

If the period of valid data is less than 85%, the 99.8th percentile of 1-hour means is provided in brackets.

- (1) Data capture for the monitoring period, in cases where monitoring was only carried out for part of the year.  
 (2) Data capture for the full calendar year (e.g. if monitoring was carried out for 6 months, the maximum data capture for the full calendar year is 50%).

### Annual Mean PM<sub>10</sub> Monitoring Results (µg/m<sup>3</sup>)

Site ID	X OS Grid Ref (Easting)	Y OS Grid Ref (Northing)	Site Type	Valid Data Capture for Monitoring Period (%)	Valid Data Capture 2022 (%)	2018	2019	2020	2021	2022
AURN 1	463348	370651	Roadside	100	100	16.8	14.1	12.2	11.8	13
AURN 2	436472	372038	Urban Background	100	100	14.4	12.7	10.9	10.3	11.4

Annualisation has been conducted where data capture is <75% and >33% in line with LAQM.TG16.

#### Notes:

The annual mean concentrations are presented as µg/m<sup>3</sup>.

Exceedances of the PM<sub>10</sub> annual mean objective of 40µg/m<sup>3</sup> are shown in **bold**.

All means have been “annualised” as per LAQM.TG16 if valid data capture for the full calendar year is less than 75%.

- (1) Data capture for the monitoring period, in cases where monitoring was only carried out for part of the year.  
 (2) Data capture for the full calendar year (e.g. if monitoring was carried out for 6 months, the maximum data capture for the full calendar year is 50%).

## Historic Environment

### Heritage Assets

The Borough has the following heritage assets:

- Listed buildings: 244 Listed buildings – one Grade 1 listed building (the Parish Church); 17 Grade II\* listed buildings and 226 Grade II listed buildings.
- Scheduled Monuments: two Scheduled Monuments
- Historic Parks and Gardens: one Grade II\* listed Historic Park and Garden; 3 locally important historic parks and gardens.
- Archaeological Sites: one site of local significance.
- Heritage Environment Record (HER): over 200 entries on the HER held by Derbyshire County Council.

# Local Authority Health Profile 2019

## Health in summary

The health of people in Chesterfield is varied compared with the England average. About 19.6% (3,460) children live in low-income families. Life expectancy for both men and women is lower than the England average.

## Health inequalities

Life expectancy is 8.8 years lower for men and 7.4 years lower for women in the most deprived areas of Chesterfield than in the least deprived areas.

## Child health

In Year 6, 21.1% (249) of children are classified as obese. The rate for alcohol-specific hospital admissions among those under 18 is 59\*, worse than the average for England. This represents 12 admissions per year. Levels of GCSE attainment (average attainment 8 score) and smoking in pregnancy are worse than the England average.

## Adult health

The rate for alcohol-related harm hospital admissions is 1015\*, worse than the average for England. This represents 1,070 admissions per year. The rate for self-harm hospital admissions is 498\*, worse than the average for England. This represents 495 admissions per year. Estimated levels of excess weight in adults (aged 18+) are worse than the England average. The rates of new sexually transmitted infections, killed and seriously injured on roads and new cases of tuberculosis are better than the England average. The rates of violent crime (hospital admissions for violence) and under 75 mortality rate from cancer are worse than the England average.

\* rate per 100,000 population

# Health summary for Chesterfield

## Health Index score for Chesterfield:

97.5

Chesterfield's Health Index score increased in 2020.

Chesterfield has an overall Health Index score of 97.5, which is **up 3.5 points** compared with the previous year.

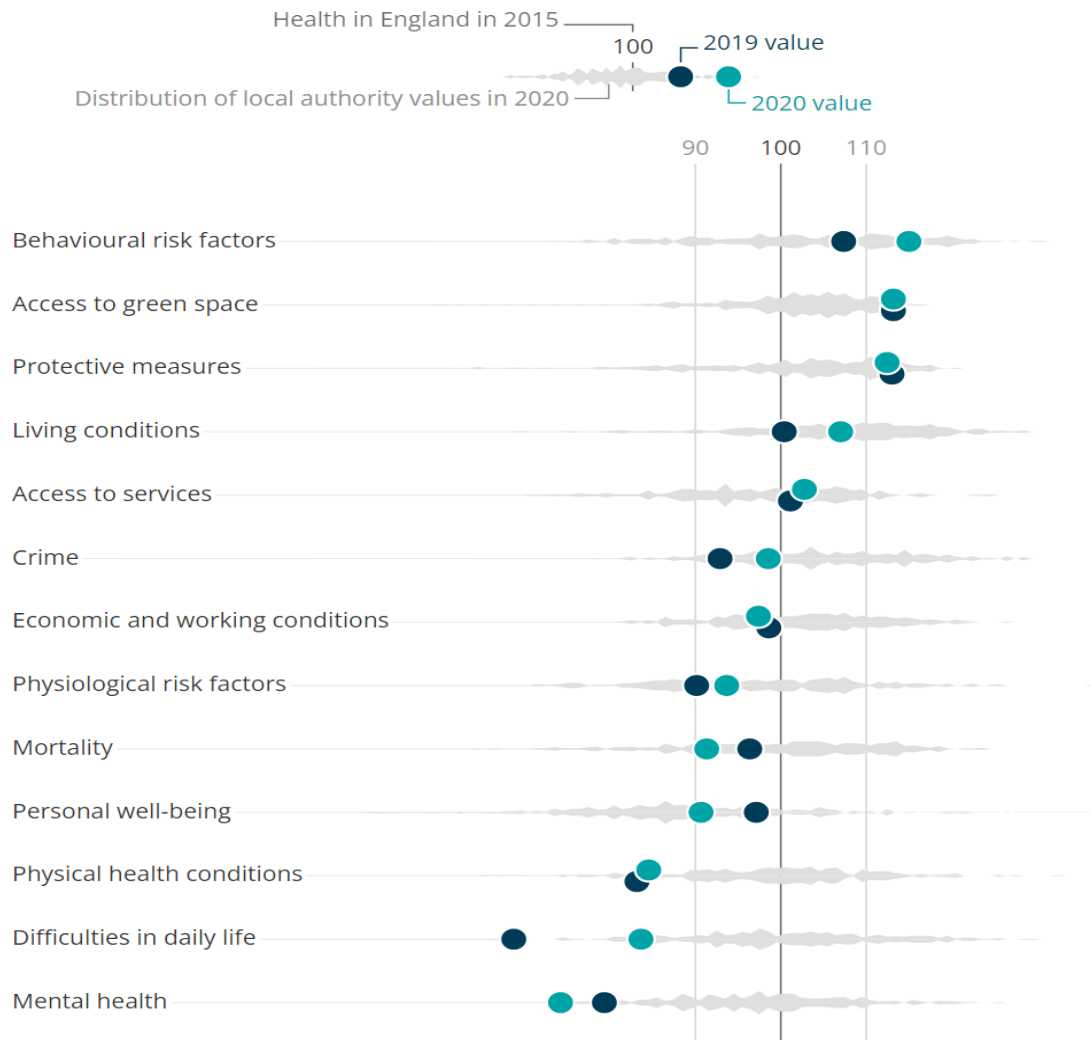

The start of the coronavirus (COVID-19) pandemic caused widespread changes to health in England. This included a worsening of personal well-being, mortality, mental health, and economic and working conditions, but also some improvements such as reduced air pollution and crime.

The ONS have created an index that gives every local area in England an overall health score for each of the past six years. This overall score is made up of measures in different categories, called domains and subdomains. These measures include physical and mental health conditions like diabetes or anxiety, local unemployment, road safety, and behaviours like healthy eating.

This score can show whether health in a local area is improving. The Health Index score has a baseline of 100, which represents England's health in 2015. A score higher than 100 means that an area has better health for that measure than was average in 2015, lower than 100 means worse health than the 2015 average.

## Health in Chesterfield is strongest among measures relating to the "behavioural risk factors" subdomain

Health Index values for each subdomain, Chesterfield, 2020

**Source: Office for National Statistics – Health Index for England**

Chesterfield's best score across all subdomains is 115.0 for health relating to "behavioural risk factors".

"Behavioural risk factors" looks at alcohol misuse, drug misuse, healthy eating, physical activity, sedentary behaviour, smoking, and sexually transmitted infections.

Drug and alcohol misuse are difficult to measure. For alcohol misuse, we count hospital admissions; however, during the coronavirus (COVID-19) pandemic people may have been less likely to seek help at hospital because of fears of infection or overwhelming services. Alcohol misuse is also sometimes hidden and not recorded.

The second highest scoring subdomain is "access to green space", while Chesterfield's worst score is for "mental health".

## Chesterfield's score for health relating to "access to green space" is better than the score for England as a whole

Health Index values for the "access to green space" subdomain in England and across local authority areas in the East Midlands, 2020

- Chesterfield
- ◆ England
- Other local authorities in the East Midlands

**Source: Office for National Statistics – Health Index for England**

Chesterfield has a Health Index score of 113.2 for "access to green space". The score for the East Midlands is 105.2, while England has a score of 99.9.

Chesterfield's score for "access to green space" puts it in the top 5% of local authority areas across England for this subdomain.

## Chesterfield's score for health relating to "protective measures" is better than the score for England as a whole

Health Index values for the "protective measures" subdomain in England and across local authority areas in the East Midlands, 2019 and 2020

- Chesterfield
- ◆ England
- Other local authorities in the East Midlands

Source: Office for National Statistics – Health Index for England

"Protective measures" addresses cancer screening attendance, and child vaccination coverage.

Chesterfield's score for "protective measures" fell from 113.0 in 2019 to 112.5 in 2020. This means Chesterfield went from being in the top 15% of local authority areas to being in the top 20% across England for this subdomain.

The change was largely driven by a worsening in child vaccination coverage (a decrease of 4.1).

## Chesterfield's Health Index value for "living conditions" improved by 6.6 points between 2019 and 2020

Health Index values for the "living conditions" subdomain, Chesterfield, the East Midlands and England, 2015 to 2020

**Source: Office for National Statistics - Health Index for England**

"Living conditions" looks at air pollution, household overcrowding, noise complaints, road safety, and rough sleeping.

Between 2019 and 2020, Chesterfield's Health Index value for "living conditions" went from 100.4 to 107.0. This means Chesterfield went from being in the bottom 40% of local authority areas to being close to average for this subdomain.

The change was largely driven by a decrease in air pollution (the index improved by 23.7 points) and a decrease in rough sleeping (the index improved by 4.6 points).

Data for noise complaints are based on the previous year, so this measure will not yet show coronavirus pandemic effects.

## Index of Multiple Deprivation 2019

The 2019 Index of Multiple Deprivation (IMD) was released in October 2019. There are 317 English local authorities included in the index (a reduction from 326 in 2015). There are 32,844 lower super output areas (LSOAs) in England which have also been ranked. Chesterfield Borough has 69 of these areas. Each of these areas has an average of 1,500 people. The IMD2019 is based on the same methodology as the 2015 Indices, providing a consistent suite of outputs which are in line with previous iterations. Although it is not possible to use the Indices to measure changes in the absolute level of deprivation in places over time, it is possible to explore changes in relative deprivation, or changes in the pattern of deprivation, between the IMD2019 and previous iterations of the Indices.

### National key messages

- Overall, 88 per cent of neighbourhoods that are in the most deprived decile according to the IMD2019 were also the most deprived according to the IMD2015.
- Deprivation is dispersed across England. 61 per cent of local authority districts contain at least one of the most deprived neighbourhoods in England.
- Middlesbrough, Liverpool, Knowsley, Kingston upon Hull and Manchester are the local authorities with the highest proportions of neighbourhoods among the most deprived in England. This is largely unchanged from the IMD2015.
- Many London Boroughs have seen a reduction in the proportions of their neighbourhoods that are highly deprived from the IMD2015.
- Seven of the 10 local authority districts with the highest levels of income deprivation among older people are in London – this is unchanged from the IMD2015.
- Middlesbrough and Blackpool rank as the most deprived districts regarding income deprivation among children

### Local Enterprise Partnerships

There are 38 Local Enterprise Partnerships in England. In 2015 Sheffield City Region was ranked as the 7<sup>th</sup> most deprived and D2N2 as the twelfth most deprived. The rankings have changed little for 2019. Sheffield City Regions remains the 7<sup>th</sup> most deprived and D2N2 is now ranked as 13<sup>th</sup> most deprived. The tables below show the SCR/D2N2 2019 ranks for the IMD domains.

	IMD	Income	Employment	Education	Health	Crime	Barriers to Housing and services	Living environment
<b>SCR</b>	7	7	6	2	6	7	35	32
<b>D2N2</b>	13	14	12	9	10	22	28	20

## Position in Derbyshire

### Overall deprivation

Authority	IMD rank – higher is better		
	2015	2019	Direction
Amber Valley	162	165	↑↑
Bolsover	61	58	↓↓
Chesterfield	85	86	↑↑
Derbyshire Dales	258	265	↑↑
Erewash	149	168	↑↑
High Peak	198	202	↑↑
North East Derbyshire	190	177	↓↓
South Derbyshire	230	218	↓↓

### Domains

Where an authority is within the 10% most deprived nationally the relevant box is in red.

District	Income	Income affecting children	Income affecting older people	Employment	Education, skills and training

### Derbyshire key messages

- Across the domains (apart from health and disability) Bolsover District continues to be the most deprived district
- Bolsover is within the 10% relatively most deprived districts for employment and income deprivation. Chesterfield is within the 10% most deprived for health and disability related deprivation.
- The most deprived neighbourhood (lower super output area) in Derbyshire is Hopewell North which lies within the Cotmanhay area of Ilkeston, Erewash. This is within the 1% most deprived neighbourhoods in England. Grangewood in Rother, Chesterfield is the second most deprived neighbourhood in Derbyshire and within the 2% most deprived areas in England.
- 22 neighbourhoods in Derbyshire (5%) fall within the 10% most deprived in England. Six are within Chesterfield (9% of our total neighbourhoods)
- Employment and health are Derbyshire's most deprived domains in terms of the number of neighbourhoods within the 10% most deprived in England – 8% and 9% respectively. For health over 50% of the neighbourhoods within this category are within Chesterfield.

### Chesterfield key messages

- While our overall indices rank has improved slightly moving from 85 to 86 this has been helped significantly by our strong rankings for crime, barriers to housing and services and living environment.
- We are now in the 10% least deprived areas for living environment and within the 20% least deprived for crime and access to housing and services. However key domains including health, income, income affecting children and employment have deteriorated.
- Chesterfield Borough is within the 10% most deprived local authority areas in England for health and disability deprivation for both the 2015 and 2019 indices of multiple

deprivation, however the rank has fallen significantly from 25 to 13 placing us within the 5% most deprived areas in England for this domain.

## Chesterfield Borough – Lower Super Output areas – Index of Multiple Deprivation 2019

Deciles – 1 indicates the 10% most deprived neighbourhoods within England and 10 the 10% least deprived. Colours – Green indicates an improvement since the 2015 index, amber indicates a static position and red indicates deterioration.
